

Brightside Community-Wide Native Planting Day Saturday, November 8th

**Groups unable to participate on Saturday may select a date within the month surrounding the planting day.*

Brightside is proud to invite you to participate in the first Community-Wide Native Planting Day on Saturday, November 8th, 2014. Over the past several decades several non-native species such as bush honeysuckle, burning bush and callery pear have been introduced to Louisville. Species such as these have had a traumatic effect on the ecosystem. On November 8th, Brightside is encouraging the citizens of Louisville to plant native plant species in an effort to combat wildlife habitat loss and strengthen Louisville's existing native plant life.

Participating community members will have a unique opportunity to make a collective impact; every tree, shrub, flower, and plant has the potential to improve not only the health of the ecosystem but also you and that of your family.

Register your family, friends, employer, place of worship, organization or school for the Brightside Community-Wide Native Planting Day. Registrants select their own planting site. Brightside offers FREE tree planting instruction, recommendations of plants that are native to Kentucky and a list of nurseries to purchase plants from.

Be sure to register any trees that are planted on the Tree Tracker, located at www.brightsideinc.org and Watch Louisville's Canopy Grow!

Please help Brightside make an important impact to our environment!

Registration: Three great options!

1. **Online:** www.BrightsideInc.org
2. **Mail:** Brightside, 527 W Jefferson St. 6th Floor, Louisville, KY 40202
3. **Fax:** 502-574-1584

***Brightside. Donor funded and volunteer driven
for a more beautiful Louisville.***
